

OVERVIEW

Webcast Pro

Self or managed service solution to broadcast interactive

Webcast technology that makes it easy to create and broadcast impactful, rich media presentations on the web. Connect with more people around the globe, no matter where they are.

Rich Media Streaming

Webcast delivers webcasts with crystal clear audio, video, and slides for an unmatched attendee experience. Experience the highest quality video stream without additional encoding hardware. Presenters can handle multiple slide decks with animations and builds. The webcast Pro can accept any video input allowing you the flexibility to deliver the most compelling content to make your presentation come to life.

Webcasting Made Easy

Users can enjoy the fastest self-service solution available in the industry. While all of your participants need is access to a web browser to view presentations Built on Adobe Flash, Webcast Pro makes it easy for them to join from virtually anywhere, without installing additional software.

For slower connections, Webcast Pro automatically lowers bandwidth requirements by switching to audio and slides to vide the best possible attendee experience.

Your Message—Delivered

Webcast Pro is uniquely positioned to serve all of your online communication needs from one source including audio conferencing, webcasting, comprehensive services, and virtual events.

Most Powerful & Global

The most powerful webcasting solution in the market with new capabilities to support up to 17 languages, multilingual close captioning for over 150 languages and a connection to a global content delivery network solution to cater to your global audience. Create detailed micro-sites with multiple themes, tabs, and social media url's.

Detailed Analytics

Detailed analytics to track attendance, demographics and even behavior inside the presentation. The Engagement Index allows organizers to define parameters and criteria to measure lead scoring, attendee engagement, content and overall success of their event.

Customized Experience

Webcast Pro is designed for complete customization. Get all of the features you need in a branded interface that reflects your organization's image and message.

From your desktop webcam to a professional production Pro, Webcast Pro can handle your video feed for live streaming, recorded or even international satellite broadcasting.
